

Chinese Privet:

Foliar application in water (inconsistent)

Glyphosate----5% solution or mix .75% imazapyr plus 2% glyphosate in growing season
Arsenal----1% solution

Basal stem application in oil

Chopper----3% solution or 8-12 ozs. per gallon of carrier (diesel or penetrating oil)
Garlon 4----20% solution

Cut stump treatment (ASAP after stump is cut)

Garlon 4----20% solution

Tropical soda apple:

Garlon/Remedy----.5% solution for spot treatment
1 quart per acre broadcast

Milestone (best material)----5-7 oz acre broadcast (soil residual also)
Spot spray----10 ml or 1/3 oz. per gallon

Grazon Next or Forefront----0.5% solution for spot spraying or 1 qt./acre broadcast

Cogon grass

Glyphosate (Accord/Roundup)----3.5 quarts per acre broadcast in the fall
Arsenal AC----1 quart per acre broadcast in the fall

Either treatment will last about 2 years. A combination of disking to weaken rhizomes with herbicide applied to re-growth is more effective. Multiple inputs will be required for long term management of cogon grass.

Kudzu

Escort----4 oz acre broadcast
Remedy----2 qt. acre with repeat applications
Transline----1.3 pint per acre
Milestone----7 ozs./acre

All applications are best if applied at bloom. Must use high water volume, 50-100 gals/acre
